

CareSignal Remote Patient Monitoring Tool

CareSignal®

Arvon CIN & CareSignal's Partnership

Arvon CIN has partnered with CareSignal to utilize their remote patient monitoring tool, which sends text messages or automated phone calls to patients on behalf of Beaumont ACO. These messages collect patient reported information, and alert Arvon CIN care team members to intervene if a patient's condition worsens. CareSignal helps Arvon CIN stay connected to patients in-between scheduled appointments by monitoring patient-reported data.

- Sends patients automated text messages or calls
- Records condition-specific, patient-reported data
- Sends actionable alerts to the Arvon CIN care team if conditions worsen
- Helps prevent potential ED visits and exacerbations

Benefits of CareSignal for Patients

- A way to keep connected to the Arvon CIN team between doctor visits
- Responses update patient's electronic chart
- Electronic chart is accessible by Beaumont ACO care team

Arvon CIN Patient Programs:

COPD

- Tracks breathing trends for COPD patients
- Identifies patients in early exacerbation to prevent hospitalizations

Diabetes

- Logs blood sugar levels

Heart Failure

- Tracks symptoms associated with heart health problems
- Can help prevent readmission long term

Hypertension

- Tracks blood pressure
